### DETAILED ACTION

This application was filed 3/25/2004 and is a Con of 10/209205 (7/30/02, US Patent #6770648) which is a CON of 09/606433 (6/28/2000, allowed) which claims benefit of Provisional Application 60/141672 (6/30/1999). Claims 21-54 have been canceled and new claims 55-86 are before the Examiner.

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20 and 55-72, drawn to compounds and compositions, classified in class 546, subclass 173+.
  - II. Claims 73-86, drawn to methods of treatment, classified in class 514, subclass 315+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process (method) of using the product can be used with materially different compounds as shown by Willson (J Med Chem, 43(4), 527-550, 2000), cited reference 10 of IDS dated 10/15/2004. .

Art Unit: 1625

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Group II is being held as non-elected by original presentation. Due to this, claims 73-86 are withdrawn from consideration.

*Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-20 and 55-72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, it is not seen where the instant specification enables the ordinary artisan to make and/or use the instant compounds where X is other than -S(O)<sub>k</sub>- and Y is other than -N(R<sup>11</sup>)S(O)<sub>k</sub>-. Other than these moieties, the specification does not enable the ordinary artisan to make or use the instant compounds.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-20 and 55-72 are rejected under the judicially created doctrine of double patenting over claims 1-33 of U. S. Patent No. 6620827 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

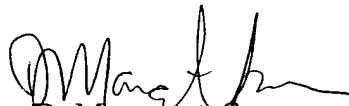

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The claims of the patent are fully encompassed by the instant claims.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
